

IEEE Citations & References (Basic Guide)

- Number references in the order that they appear in your text, at the end of your paper, under the centred heading REFERENCES.
- Cite using the reference number, including a range of sources with dashes [7-10] and multiple references with semicolons [4; 7] or separate brackets [4], [7].
- Cite within or at the end of a sentence, with or without naming the source, but always with a space ahead and punctuation following.
- Use page numbers (unless citing a whole work): [5, p. 38], or [5, pp. 38-57], or "... on page 38 of [5] the author...." Use alternative divisions where necessary: [5, Fig. 2], [5, Appendix 4], [5, Sec. 4.5.2].
- Omit needless and redundant information, and abbreviate whenever possible.
- *et al.*, is used for 6+ authors.
