Subject: Lab Applications

Lab Applications

StFX University students and faculty now have access to **MyLabApps**, a suite of software applications necessary to support teaching and learning. This service provides secure remote access to specialized application software traditionally used in on-campus computer labs. **A list of application software available may be found here along with the link to the MyLabApps portal:**

<https://stfx.teamdynamix.com/TDClient/1764/Portal/Requests/ServiceDet?ID=39828>

Applications can be accessed from any computer running a web browser, including Chromebooks. Users will need to use their StFX University provided credentials to access this service.

From the applications accessed through the MyLabApps portal, users can access and save work to their personal storage (H:\ drive) and print to personal or campus shared printers.

Students and faculty are licensed to download and install several applications for academic purposes. These applications will not be available in the MyLabApps portal, faculty and students must install these applications on their StFX issued or personal computer to meet course requirements. Some applications will require sign-up and/or verification of faculty or student relationship with the university. All applications listed are available for both Mac OS and Windows. **A list of application software available for installation including links to downloads may be found here:**

Students and faculty are not required to access MyLabApps to use Microsoft Office software. Students and faculty can install Microsoft Office on up to five devices, at no

cost, through the university's Microsoft Enrollment for Education agreement. For more information, visit the IT Services page:
